#### **DETAILED ACTION**

## Response to Amendment

1. In response to the Final Rejection mailed 10/12/2007, applicant has submitted an Amendment After Final, filed 3/12/2008, amending independent claim 10, canceling claims 7-9 and 15-16, and arguing for the allowability of the remaining pending claims 10-13, claims 1-6 and 14 having been previously canceled.

## Response to Arguments

2. Applicant's arguments with respect to the limitations already present in the original claim 10 have been fully considered and are persuasive. The Final Rejection of has been withdrawn, and, no new prior art having been found, an Ex Parte Quayle action appears below, there still being a 35 USC 112 paragraph 2 problem in claim 12, detailed below, as well as informalities in the Title and Abstract of the Specification, objected to next.

## Specification

3. The Abstract of the disclosure is objected to because it fails to mention the subject matter making claim 10 allowable. Specifically, it fails to mention that the voice control system substitutes the other of a pair of opposite commands if the speech recognizer interprets the command input as not being selectable at the given system state. Correction is required. See MPEP § 608.01(b).

Art Unit: 2626

The Title of the invention is not sufficiently descriptive. A new title is required that is clearly indicative of the allowable subject matter in the invention to which the claims are directed. The following title is suggested: "Voice control system substituting the oppositely-working command in a pair if the recognized command is not selectable for the given system state".

## Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites that the substituting unit **does not** substitute the other of the reciprocal pair of oppositely-working commands if the recognized one of the pair is not selectable for the given system state. This contradicts the limitation of parent claim 10 which recites that under the same conditions it **does** make this substitution.

#### Allowable Subject Matter

6. Claims 10 and 11 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance:

Claim 10 is allowed because it recites that if the voice command recognizer recognizes the input command as one of a reciprocal pair of oppositely-working

commands which is not selectable for the given system state, it substitutes therefor the other of the reciprocal pair.

While Kaneyoshi teaches the substitution of a selectable command, the selection does not take into account whether the selectable command is one of a reciprocal pair, but chooses the most probable command without checking whether the recognized command is one of an oppositely-working pair.

New reference Kitaoka et al., while disclosing substituting the other of a recognized command from a reciprocal pair of oppositely-working commands if other commands in the group of similar-sounding commands has a high similarity thereto, but the candidate commands in question are all selectable in the given system state, while the recognized command merely performs an operation that cannot be easily undone.

Claim 11 is allowed because it further limits its independent claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Claims 12 and 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office Action and to include all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 2626

Claim 12 has allowable subject matter, because the prior art of record does not teach **not substituting** the **other** of a reciprocal pair for a recognized reference command that is one of a pair of commands working oppositely to each other, even though it is selectable for the given system state.

Claim 13 has allowable subject matter because it further limits claim 12.
